

## ***Rules of Book Title Draw***

- 1. Divide into teams of two or three people.***
- 2. Determine in what order the teams will play (roll the dice, draw numbers, etc.).***
- 3. Decide how many clues each team will draw (I suggest 5-7).***
- 4. The first team designates the artist for that round (everyone should have a chance to draw throughout the course of the game).***
- 5. The artist picks the first card from the deck and draws the book title listed on the card (without showing the card to team members!). No letters or numbers allowed!***
- 6. The team has one minute to guess the title of the book based on the drawing.***
- 7. If they guess correctly within a minute, they receive one point for the round. If time runs out and they haven't guessed correctly, they get zero points for that round.***
- 8. The next team takes their turn, and the cycle repeats itself.***
- 9. When every team has taken the number of turns identified in step 3, tally up the scores to determine the winner.***
- 10. In case of a tie, the tied teams will have a "draw off." Each team will draw and try to guess the same book title at the same time. This means the artists will have to pass the same card among themselves. The team that guesses correctly first is the winner!***
